TEACHING EXPERIENCE

Object-Oriented Programming and Advanced Data Structures (CSEN 79) Winter 2025
Santa Clara University
Developed original course content with a strong focus on in-class problem solving and coding. Introduced a term project component to give students hands-on experience applying the material.

Computer Networks (CSEN 233) Fall 2024
Santa Clara University
Developed new instructional material to emphasize practical application of network protocols.

Operating Systems (CS 480) Summer 2023, Summer 2024
San Diego State University
Converted the course into a fully project-based learning experience. In this accelerated 6-week format, students worked in groups to implement a new project each week based on the lecture topics.

Computer Organization (CS 240) Spring 2022, Fall 2022, Spring 2023, Fall 2023, Spring 2024
San Diego State University
Redesigned the course and lab structure to reflect modern industry requirements. Built a lightweight autograder to help students get instant feedback on their codes — a feature that was later adopted by other instructors.

Advanced Programming Languages (CS 420) Fall 2023, Spring 2024
San Diego State University
Introduced Haskell into the curriculum for the first time. Designed new lab modules to explore type systems and functional programming.

Intermediate Programming (CS 160) Fall 2021
San Diego State University
Created in-class exercises for students transitioning from beginner to intermediate JAVA programming.
